### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bruce Kramer on 04 February 4, 2005.

The application has been amended as follows:

In claim 1, starting at line 5, please delete "wherein the contained Li is the element obtained by a method to insert lithium in the active material by chemical method" and replace the phrase with

"and if Li is contained in the  $\beta$ -FeOOH, the Li is incorporated into the  $\beta$ -FeOOH in advance of insertion/extraction of lithium"

The following is an examiner's statement of reasons for allowance:

The examiner's amendment is supported by page 8, lines 7-21 of the specification as originally filed. The amendment serves to clarify applicants' invention, in which Li can be incorporated into a low-crystalline  $\beta$ -FeOOH prior to intercalation or deintercalation of additional lithium in the structure.

Applicants' amendments overcome the prior art of record, Amin, JP 10-233215

A. Amin discloses lithium secondary batteries using  $\beta$ -FeOOH structures incorporated

with other elements as cathode materials. However, the elements Amin incorporate into the  $\beta$ -FeOOH structure are distinct from those claimed by the applicants, and there is no motivation in the prior art to incorporate the elements recited by the applicants into a  $\beta$ -FeOOH structure used as a lithium battery cathode material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
